	Information Icon

➤ How to switch to Multi-currency Count operation (if multi-currencies software is purchased)

Touch [🇺🇸] country flag on screen to select multi-currencies option. MIX (will process mixture); AUTO (will separate them).

➤ **Mixture currencies will be counted in Single-Pass.**

Press [CHANGE] CHANGE key for count results on all currencies

or press PRINT Key to print.

➤How to Auto-Print Receipt to a printer?

User can set up Automatic printing of count result receipt by choosing Auto Printing ON. Machine will start printing as soon as banknotes are removed from Stacker.

MENU ➜Count Interface ➜Report Result➜Auto-Print ON

➤ How to view 'The Day Total', & 'Grand Total'

Press MENU Key ➜ My Grand Total ➜ To Print

➤ How to Batch by Qty or by Amount ($)

MiB-11V allows users to select counting of banknotes by preset batch number (5,10,20,25,50,100, 200 etc) or by a specific Qty by Amount ($). Press ➜ 🔘 to access Batch menu. Start/Stop to save.

## ➤ How to activate ADD function?

⊕ ADD function is to provide a cumulative count of continuous operation (multiple stack or banknotes) of processing banknotes.

Touch ⊕ and select ADD to activate and Save count manually by touching [ACCEPT] after a count is completed. Count results will then add to 'The Day Total' and 'Grand Total'.

SELECT ADD TYPE
- ○ OFF
- ◉ ADD

## ➤ How to set and activate Denomination Batch (DB) for each denomination.

To process each denomination of banknotes by a fixed batch number **(apply to SINGLE, FACE, SORT).**

🔘 **Setting: Touch Batch key➜ Denom Batch(DB). By default, all denominations are set to 100.**

To change, touch each of the **denomination and Count** and make your changes and SAVE.
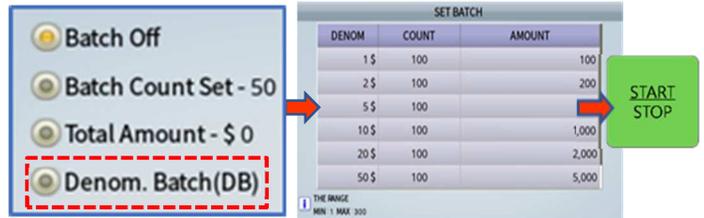

➤ How to perform Manual INPUT for non-recognized genuine bills in reject pocket.

Prior removing bills from Stacker pocket, by touching [INPUT] icon on Touch Screen, user can see INPUT VALUE screen and can add uncounted banknotes to total count result. Once Manual INPUT is done, Press START / STOP accept results to Total instantly.
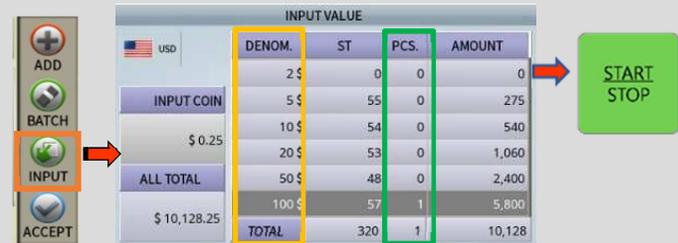

➤ Important Counting Modes and explanation:

MIX (As Default Mode)
When Mix mode is selected, Machine will count and denominate mixture denomination of banknotes.

SINGLE
Machine counts and delivers first detected genuine banknotes as standard to Stacker and delivers rest to Rejct Pocket.

SORT (for Organized Strap)
Machine processes organized denominations in a strap of banknotes (Strap banknotes from POS cash drawers).

FACE (Direction)
Machine delivers first deteced Face of banknote to Stacker and deliver reverse to Reject Pocket. Using **[ORIENT]** mode, user can also perform ORIENTATION for Faced banknotes.
