S-200 GRAVITY COIN RAIL SORTER

MAJOR FEATURES

S-200 Coin Sorter uses advanced "COINSURE" metal-alloy coin sensing technology. It is medium duty, reliable and accurate. Best suitable for small banks, vending, amusement parks, car-wash etc.

Mixture Value counting, denomination Sorting, Batching, Bagging and Printing of various counting receipts.

S-200 is equipped with BUILT-IN Coin cleaning Tray on the top which prevents debris, dust to enter into Coin counting Disc.

"COINSURE" sensor diverts all foreign Coins, slugs and damaged coins into coin Reject drawer.

S-200 is equipped with 2 different batching options (1) FRB fixed Full Bag stops, i.e 10,000 for dimes (2) Free batch up to 9,999 for all coin denominations.

With "CAS" mode, S-200 can accommodate up to 9 cashiers and keep track of counting results for all cashiers.

S-200 LCD display shows Current Count and Details, Grand Total, and Day-Total.

If External Printer is connected, S-200 prints Customer deposit, Day-total and also Partial Bag Total for incomplete FRB full bag for users to continue counting next day from last bag count.
