S-500 Belt-Driven High Speed Coin Sorter

S-500 on Open Floor Stand

MAJOR FEATURES

S-500 Coin Sorter uses advanced "COINSURE" metal-alloy coin sensing technology. It is fast, reliable and accurate. Suitable for Financial, Transit companies and other high-volume coin processing operation.

Mixture Value counting, denomination Sorting, Batching, Bagging and Printing of various counting receipts.

S-500 is equipped with built-in automatic coin conveyor belt which prevents overflow of coin disc, thus reduce coin jamming.

"COINSURE" sensor diverts all foreign Coins, slugs, damaged coins into coin Reject Bin or bag (if attached).

S-500 is equipped with 2 different batching options (1) FRB fixed Full Bag stops, i.e 10,000 for dimes (2) Free batch up to 9,999 for all coin denominations.

With "CAS" mode, S-500 can accommodate up to 9 cashiers and keep track of counting results for all cashiers.

S-500 LCD display shows Current Count and Details, Grand Total, and Day-Total.

If External Printer is connected, S-500 prints Customer deposit, Day-total and also Partial Bag Total for incomplete FRB full bag for users to continue counting next day from last bag count.
